Rhapsody® Outdoor Musical Instruments Welcome Preschoolers to Join the Band

Expansion of collection delivers music within reach for kids ages 2 to 5

Delano, Minn. (June 21, 2017) — The joy of making music on the playground can now be enjoyed at any age.

Landscape Structures Inc., a Delano, Minn.-based commercial playground equipment manufacturer, has expanded its collection of Rhapsody® Outdoor Musical Instruments with six instruments that are a bit smaller and lower to the ground—sized just right for kids ages 2 to 5. This superior collection of chimes, metallophones and drums now welcomes musical newbies as well as polished musicians to explore the power of rhythm.

Originally introduced in January 2016, this playful and elegant collection lends itself to any environment—playgrounds, community centers, schools, senior centers and more. With the addition of the junior Rhapsody instruments, this playground activity is now ideal for childcare centers, preschools and other early childhood facilities. Learn about the instruments included in the new line of Rhapsody Outdoor Musical Instruments:

- **Warble™ Chimes** Kids can bing and bong their way along one full octave on this richly toned instrument.
- **Jingle™ Metallophone** Eight brilliant notes ring out on this fully inclusive instrument.
- **Ditty™ Metallophone** Little ones will enjoy making up tunes with the eight major notes these flat bars make.
- **Drums** High-quality drum skins are made from polycarbonate, textured on the underside for a professional finish to stand up to the rigors of play and temperature extremes; choose from the Kundu Junior Drum, Kettle Junior Drum or Goblet Junior Drum.

Landscape Structures consulted with a musical advisor on the development of the original line of Rhapsody Outdoor Musical Instruments to ensure every instrument in this patent-pending collection achieves precision manufacturing and consistency in tones. That's how the new junior collection delivers the same great sound. Even more, all of the Rhapsody instruments are manufactured to endure years of music making in the elements.
