The play components identified on this plan are IPEMA certified. (Unless otherwise noted) The use and layout of these components conform to the Canadian Standards Association (CSA) Standard CAN/CSA-Z614. To verify product certification, visit www.ipema.org.

Choose a protective surfacing material that has a critical height value to meet the maximum fall height for the equipment (Ref. ASTM F1487 Standard Consumer Safety Performance Specification for Playground Equipment for Public Use, Section 8 current revision). The subsurface must be well drained. If the soil does not drain naturally it must be tiled or sloped 1/8" to 1/4" per foot to a storm sewer or a "French Drain".

This conceptual plan was based on information available to us. Prior to construction, detailed site information including site dimensions, topography, existing utilities, soil conditions, and drainage solutions should be obtained, evaluated, & utilized in the final design. Please verify all dimensions of play area, size, or orientation, and location of all existing utilities, equipment, and site furnishings prior to ordering. Slides should not face the hot afternoon sun.

This layout includes fitness equipment for users ages 13 and older. Fitness equipment that is designed for ages 13 and older does not fall under the scope of ASTM F1487 - the Standard Consumer Safety Performance Specification for Playground Equipment for Public Use. Age appropriate signage is recommended.
