### **Committed to Continuous Improvement, Landscape Structures Enhances the Eclipse® Net Climber**

Enhanced designs will encourage creativity and imagination in kids ages 5 to 12  
Delano, Minn. (May 14, 2013) — Landscape Structures Inc., a Delano, Minn.-based commercial playground equipment manufacturer, is excited to introduce its latest playground enhancement—the Eclipse® Net Climber. While the Eclipse Net was launched in 2011, in keeping with its commitment to continuous improvement, Landscape Structures has made enhancements to the product, which includes a lower cost, installation improvements and more design flexibility. All of these enhancements will benefit playground designers and purchasers.

In addition to a new and lower price, the Eclipse Net is now easier to install. The enhanced product design has four fewer footings, and the size of the remaining footings has decreased, which will require less concrete for installation. Because of those enhancements, the installation time has been reduced by more than half creating even more savings for customers.

The most exciting enhancement to the Eclipse Net is the increased design flexibility. The area required for installation has been reduced, allowing the net climber to fit into more compact spaces. Landscape Structures has also added more color options; customers can now choose either a red or black net. Even more, the enhanced Eclipse Net can be expanded to create a unique playsystem—the Eclipse Net Plus—by adding on play components.

The design of the Eclipse Net Plus can be tailored by customers to best fit the needs of their community while meeting their space and budget requirements. With more than 20 playground components from which to choose, the Eclipse Net Plus can be expanded in a variety of configurations.

Designed with kids ages 5 to 12 in mind, this unique playsystem will encourage creativity and imagination via its geometric climbing cables and limitless play routes.

Landscape Structures has decades of extensive custom design experience, and has designed, manufactured and installed nearly 5,000 one-of-a-kind playgrounds throughout the world. The company can turn an ordinary playground into an outdoor adventure by using traditional playground materials, concrete or a blend of both. With the combination of its unique manufacturing capabilities and its highly specialized team of designers and artists, Landscape Structures creates destination playgrounds that welcome kids, families and entire communities.
