Stimulate the Senses with Pulse™ by Landscape Structures Inc.

Multisensory games add lights, sound, touch and more movement to the playground Delano, Minn. (Jan. 22, 2013) — Landscape Structures Inc., a Delano, Minn.-based commercial playground equipment manufacturer, has introduced Pulse™, a multisensory way to add lights, sounds, touch and more movement to the playground. Pulse offers three interactive games with stimulating LED light patterns and sounds that help kids develop their muscles, hand-eye coordination and action/reaction skills. Pulse games are simple, intuitive and engaging for the whole family.

Landscape Structures is committed to providing sensory play experiences in an effort to create truly inclusive playgrounds. The addition of Pulse to its product offerings will bring children of all abilities together for visual, auditory and tactile stimulation. Additionally, the three new games encourage social interaction, teach the value of sportsmanship, and help develop physical coordination and spatial awareness.

- Pulse Tennis is great for two to eight players ages 5 to 12. With flashing lights and realistic tennis sounds, kids will be encouraged to run, lunge and stretch to send the light back to their opponent.
- Pulse Table Tennis welcomes two to four players ages 2 to 12. Kids develop hand-eye coordination and concentration as they watch for the light to bounce back to them. Table tennis, installed at a wheelchair-accessible height, is great for therapeutic settings.
- Pulse Tempo rewards kids for their movement with five unique sound and light shows. Designed for up to six players ages 2 to 12, Pulse Tempo helps advance kids' motor skills.

The quality that users have come to know from Landscape Structures is built into Pulse. Its sensors are waterproof, have sustained extreme climate testing and are constructed from a tough, impact-resistant polycarbonate material.

Pulse is easy to install. A standard AC power supply is required as the games run on safe, low-voltage power and use energy-efficient LED lights, and all game controls are housed in a waterproof, outdoor-rated enclosure. Detailed, easy-to-follow installation instructions are provided with each game.

Watch Pulse in action and hear what kids have to say about the new multisensory play experience at playlsi.com.

Since 1971, Landscape Structures Inc. has been the leading commercial playground equipment manufacturer in the world.
