Engage the Senses with New Spinners from Landscape Structures

Deliver valuable spinning movements with stunning new spinners

Delano, Minn. (Feb. 19, 2019) — Landscape Structures Inc., a Delano, Minn.-based commercial playground equipment manufacturer, is excited to introduce two new spinners that are sure to be a stunning and fun addition to any play space. Spinning is one of the core movements that engages the vestibular system, and the new Chill™ and Curva™ Spinners will provide kids' brains with valuable equilibrium information.

Whether park and playground planners are creating a modern or traditional look for their projects, Landscape Structures' new spinners will help complete the playground design. The Chill Spinner, with its textured latex-free black rubber belting, delivers a comfortable and secure ride for thrills or relaxation. The Curva Spinner and its textured black GripX platform provides a stable base for one child or multiple kids to stand on and ride around and around. Carry out a designer look by choosing a stainless-steel frame for the spinner or add a pop of color with Landscape Structures' ProShield® finish.

Through sensory play, children discover their world and how to be successful in it. They develop behaviors based on what they touch, see, hear, taste, smell, and how they move and position their body in space. Sensory-rich playgrounds allow children to integrate and develop their senses and the more they play, the more they develop skills necessary to engage, change and impact the world around them.

See the new spinners in action and learn more about them and all of Landscape Structures freestanding playground spinners at playlsi.com.

About Landscape Structures Inc.

Since 1971, Landscape Structures Inc. has been the leading manufacturer of commercial playground equipment in the world. Our employee-owned company designs community and school playgrounds that encourage kids of all ages and abilities to learn persistence, leadership, competition, bravery, support and empathy through play. We push the limits—of design, inclusion, play—to help kids realize there is no limit to what they can do today and in the future. For a better tomorrow, we play today.
